

Thank you for buying flowers pack!

Description

This package contains a collection of low-poly stylized flowers ready to use in Unity.

All models are optimized, properly scaled, and suitable for games, AR/VR, visualizations, or stylized environments.

Folder Structure

Everwide assets/

```
└─ Flowers/
    ├── Scenes/           - Sample scenes with arranged flowers
    ├── FlowerAssets/     - Source files for flowers
    ├── Prefabs Standart/ - Prefabs of each flower for SRP
    └── Prefabs URP/      - Prefabs of each flower for URP
```

Usage

Drag and drop prefabs from the Prefabs/ folders into your scene.

All objects use 1:1 scale and are centered at the origin.

Materials and textures are already applied.

Demo scene is included to preview assets in context.

Tips

All models are using Unity's URP-compatible materials.

All flowers(instead of LOD2) use single material with color palette

Adjust LOD or colliders as needed for performance.

LookAtCamera script included (for LOD2 models to always look at camera)
